

# Knowledge Exchange Session Green and Low Carbon Supply Chains

**Would you like the answers to the following questions:**

**What savings can be made through reducing CO2 emissions in your supply chain?**

**What potential solutions are available to release these savings?**

**What service improvements can be made through reducing CO2 emissions?**

**What can you learn from other sectors?**

We are putting on a Knowledge Exchange Session to address these and others questions around the future of Supply Chains. You are invited to participate in this session with many of the leading academics and practitioners.

Our Knowledge Exchange Session will bring together

- Presentation from the Supply Chain Director of Rolls Royce
- Presentations from prominent academics
- The chance to compare ideas with individuals who are responsible for addressing these questions in other organisations
- Introductions to the latest developments in decision support for supply chains
- Identification of opportunities for your company to get academic input at no cost

This ½ day knowledge exchange session is planned for 24th March at the ICOSS centre at the University of Sheffield.

## **Programme for the Day**

**9:00** Welcome

**9:15** Keynote speaker - Ian Shellard (Supply Chain Director of Rolls Royce)
